Lincoln Middle School
Mr. Justin Jonas
200 S Lincoln Ave
Park Ridge, IL 60068-3816

Dear Mr. Jonas and Students:

We are pleased to report that Water for South Sudan has drilled the well that you sponsored. We have now drilled over 300 wells since 2005—and yours was our 330th well. We are deeply grateful for the continued support of donors like you which enables our work.

WFSS will continue to provide access to clean water and hygiene education, led by our South Sudan team. Although parts of South Sudan continue to experience unrest, we have been able to continue drilling wells safely. Our work continues to provide grassroots development and sustainability for rural villages and schools. The installation of a new well can also serve as a starting point for conflict resolution between different groups, bringing peace and stability.

Attached please find photos of the well that your donation helped drill. Your well is in the village of Pan-Malou in Arek-Rek, Aweil East, South Sudan. The village chief is Ayuel Tong Manyuol. You can see your well on a map [here](#). GPS coordinates are 8.750567, 27.417731.

Thank you for your support and generosity, which is now helping to provide fresh, clean water, and a new future, to the people of Pan-Malou in South Sudan.

Very truly yours,

Lynn Malooly
