Investments in Student Learning 2017-18

(as of September 25, 2017 Board of Education meeting)

District 64 enters 2017-18 guided by its 2020 Vision Strategic Plan. Now in its third year, the plan identifies six strategic objectives that encompass the most important challenges and priorities District 64 will work to address through 2020.

Our six objectives are to:

- 1. Develop Students Who Master the 4C's: *Communication, Collaboration, Creativity, and Critical Thinking*
- 2. Provide a Rigorous Education for All Students
- 3. Differentiate to Meet the Academic and Social/Emotional Health Needs of All Students
- 4. Foster Effective Communities of Practice through Professional Development and Staff Support
- 5. Provide Safe and Secure Learning Spaces to Support 21st Century Learners
- 6. Maintain Fiscal Responsibility that Reflects a Commitment to Student Learning and a Rich Variety of Programs and Services

Inspire every child to

A critical and ongoing priority for all staff throughout the five years of the plan is the implementation of a differentiated, rigorous curriculum supported by technology. Professional development will continue to focus on the high-impact instructional strategies proven to increase student learning, including differentiation, formative assessment, student engagement, and inquiry-based learning. During the 2017-18 school year, strategies for supporting student engagement will be studied in-depth.

Curriculum maps and common assessments are the foundation for a rigorous, differentiated curriculum. Over the course of the 2017-18 school year, we will continue work on pacing guides in core, encore areas, and elective areas. In addition, common assessments will be identified for instructional units. Common assessments will be used to identify students for additional support or challenge. Funding will be dedicated for summer curriculum writing to support these efforts.

The **English Language Arts Curriculum Committee** recommended the adoption of the *Unit of Study - Reading* for kindergarten through fifth grade and *Schools Units of Study* for middle school. This year, professional development will support committee members and other teacher leaders with initial implementation. All staff will participate in professional development in spring 2018. Also by spring 2018, we expect a recommendation from this committee in the area of writing. Professional development funds also will be provided to support the **Middle School Science Team** with piloting the new curricular materials from the *Smithsonian Science Education Center*.

District 64's Core + Committee (and subcommittees) made several important decisions advancing the implementation of a **Multi-Tiered System of Support (MTSS)** formerly known as **Response to Intervention (RtI)**. Benchmark assessments in reading and math continue to provide data to support differentiation and participation in math and reading interventions. In

2017-18, math interventions are available for at-risk students in grades K-8. All students in the district (PreK-8) will regularly receive instruction in the Second Step Program, which is a Tier 1 curriculum to support the development of social-emotional skills. An additional program (Caring School Communities) is being piloted on the elementary level, which focuses on developing a sense of community within each classroom. Beginning in fall 2017, a common process and system for problem solving and providing individualized instruction is in place. The D64 process was developed by a committee, and defined within a manual. Staff development on this common process has been provided for all teachers in the District. All problem solving information is now stored electronically making it easier for staff to access and share the information. IEPs and 504 plans are also stored and shared within the system. All of this work aligns with Strategic Objective 3.

In addition, the District also is maintaining an array of **online subscriptions** that are used to support student learning. All of our core textbooks have online resources associated with them for both student and teacher use. Additional supplemental resources, such as *Study Island* and *Raz Kids*, provide students with dynamic and differentiated opportunities to practice instructional skills during school hours as well as at home. Digital media tools, such as *World Book Online*, provide teachers and students with current resources connected to their curricular studies. Beyond the content resources, the District has also rolled out creative learning tools *WeVideo* and *Explain Everything* as well as a student portfolio and reflection tool called *Seasaw*. These tools expand the repertoire of learning tools with which our students are empowered to discover, learn, achieve, and care.

The District will continue to invest in **technology** to maintain, refresh, and provide essential tools and resources for student learning. Highlights of this commitment include:

- **Chromebooks** will continue to be utilized in a 1:1 program for grades 3-8 to support 21st century learning, as well as the new requirements for the state's online PARCC assessment.
- **iPads** will continue to be maintained in all Kindergarten through 2nd Grade classrooms to support small group activities and instruction, as well as differentiation for all learners.
- The technology budget will also include funds to support and monitor a robust infrastructure to provide for a **reliable network** for student learning and District operations.

The District currently has completed a wireless infrastructure upgrade project supported in part by the federal E-Rate funding source. In addition, the District has also awarded the District's Wide Area Network leasing and service to WANRack LLC. In summer 2017, the network infrastructure was built out to provide an increase of bandwidth of 10GB between the District's building locations. This also will provide a robust platform upon which to increase network resiliency and flexibility that foster long-term cost containment. The District also attained a secondary Internet Service Provider to facilitate the network resiliency and WAN optimization infrastructure.

The **Human Resources Department** continues to study and monitor salary and benefits for all positions as a way to ensure that District 64 remains competitive, yet fiscally responsible in attracting and sustaining District 64 employees. In past years, after studying the staffing in our

lunchroom program it was recommended and the Board approved, resetting the starting rates for all lunchroom supervisor positions. The Human Resources Department is currently studying the pay rates for substitute teachers to determine the impact of creating and maintaining an adequate pool of qualified substitute teachers.

Additionally, the Human Resources Department this year has invested in an evaluation database tool, call *My Learning Plan*, to improve efficiency within our evaluation process. The program allows District administrators to easily complete, sort, and store the various evaluation forms required yearly in the District. It also allows our certified staff to easily access and share evaluation information with their administrator electronically in a safe and uniform manner.

Finally, the department continues to train new administrators in the use of HUMANeX, a screening methodology that allows for greater continuity in the initial interview process of potential candidates.

In July 2015, administration shared with the Board of Education a **Health Life Safety Survey (HLS)** and the **Master Facilities Plan (MFP)**. From these reports and field verifications by the Director of Facility Management, the Board was alerted to many critical infrastructure projects needed to ensure the integrity of our buildings. Roofs, exterior brick areas, parking lots, windows and safety lighting were at a stage in which replacement and repair could not be postponed. Projects continue to be implemented each year from the HLS/MFP.

During summer 2017, renovation of the Learning Resource Center to a future-ready learning space and providing an adjacent secure vestibule/remodeling of the main office were completed at Lincoln Middle School. By redesigning the initial plan for the secure vestibule, the District did not require an addition to the building resulting in a cost savings. The school also had galvanized piping replaced, water main reconfiguration and a pressure pump added to correct poor water pressure on the upper floors. Tuckpointing work at Lincoln, Franklin and Roosevelt schools continued, with still more planned for completion in upcoming years. At Lincoln, partial abatement of asbestos floor tile was completed and replaced with new VET floor tile in all hallways. In addition, Field School received all new windows and Roosevelt School received a new roof. Kitchens at the five elementary buildings were remodeled in preparation for the start of a new daily hot lunch program, which kicked off on Tuesday, September 5, 2017.

In September 2017, the Board will begin to review the proposed projects for summer 2018 and the funding for these projects. These projects will include the next group of critical HLS and MFP items that when completed, will provide our staff and students with an environment that is safe, warm and dry, and conducive to learning. Discussions and recommendations will also be made to continue installing secure vestibules in all facilities across District 64.

Our in-house maintenance continues to be busy with painting/remodeling projects building future-ready classrooms and doing general maintenance. The Grounds department is busy maintaining the greenscape and playgrounds, while planning for winter plowing and salting. Other members of our staff continued replacing water fountains at the middle schools with filtered combination drinking fountain/bottle fillers. All buildings now have at least one unit per floor. We will continue to replace existing fountains going forward. Both Emerson Middle

School and Washington School will have the outdoor building and parking lot lighting replaced with energy efficient LED lighting in fall 2017, utilizing grant money from the ComEd Public Sector Energy Efficiency Program (PSEEP) to help offset costs.

To help save the costs on construction in our Learning Resource Centers (LRCs), our maintenance team did the demolition work at Field, Franklin and Carpenter Learning Resource Center (LRC). Our on staff electrician installed the new electrical requirements to meet the new design of the LRCs. The team also continues to move through the buildings covering our existing chalk boards with a porcelain coated whiteboard, and replacement of interactive whiteboards and projectors with new interactive projectors that work on a standard whiteboard.

We continue to look at energy-saving enhancements, such as replacing obsolete lighting with LED lighting, adding state-of-the-art occupancy controls to classroom lighting, automation controls on the HVAC systems, and energy efficient window replacements, to name but a few. The District is also utilizing funding through the ComEd PSEEP to help finance these projects.

The 2017-18 budget is a reflection of the work that will occur this year on our 2020 Vision Strategic Plan in terms of curriculum, technology, special education, staffing and our facilities. The work on our Strategic Plan is balanced with our need to continue to use our funds wisely and defer an operating rate referendum further into the future.
